

Borrowing a device? Use the website:

<https://skethz.github.io/eecis-device-rental/>

Rental rules

- **Initial request:** To rent a device from H66, a user must submit a request to the lab manager (Seungki Hong, hongse@ethz.ch) via the device list. The request specifies the rental period, your name and group.
- **Extensions:** If you wish to extend the rental period, you must submit another request via *My rentals*.
- **Returns:** When returning the device, you must submit the return record via *My rentals*.
- **Overdue warnings:** If the rental period expires and no return is recorded in the system, a warning email is sent automatically to you, your lab manager and professor, and our lab manager — every day until the return or extension request is recorded.
- **New devices:** Group members who purchase a device must request to add it on the *Devices* page; it appears in the list once the lab manager approves it.

How to sign in

Open the website, enter your @ethz.ch address and press “Send code”. An 8-digit code is emailed to you (sender “EECIS Rental” — check your Junk folder the first time and mark the sender as safe). Type the code to sign in; no password is needed.

Questions: Seungki Hong (hongse@ethz.ch), lab manager
